Wei

Regional Development in China

States, Globalization and Inequality

This study systematically examines uneven regional development in China, focusing on three central agents: the foreign investor, the state and the region. Wei's findings have important implications for theories of, and policy towards, Chinese regional development. This book is a vital resource for those with an interest in transition economies.

This study systematically examines uneven regional development in China, focusing on three central agents: the foreign investor, the state and the region.
