Ganzinger / Jones

Programs as Data Objects

Proceedings of a Workshop, Copenhagen, Denmark, October 17 - 19, 1985

Strictness analysis and polymorphic invariance.- Convergent term rewriting systems can be used for program transformation.- The theory of strictness analysis for higher order functions.- Recognition of generative languages.- Modular first-order specifications of operational semantics.- Logic specification of code generation techniques.- Strictness detection in non-flat domains.- Strictness computation using special ?-expressions.- A relational framework for abstract interpretation.- Expected forms of data flow analyses.- Code generation from two-level denotational meta-languages.- Multilevel functions in Martin-L¿f's type theory.- An implementation from a direct semantics definition.- The structure of a self-applicable partial evaluator.- Program transformation by supercompilation.- Listlessness is better than laziness II: Composing listless functions.- From interpreter to compiler: A representational derivation.

Strictness analysis and polymorphic invariance.- Convergent term rewriting systems can be used for program transformation.- The theory of strictness analysis for higher order functions.- Recognition of generative languages.- Modular first-order specifications of operational semantics.- Logic specification of code generation techniques.- Strictness detection in non-flat domains.- Strictness computation using special ?-expressions.- A relational framework for abstract interpretation.- Expected forms of data flow analyses.- Code generation from two-level denotational meta-languages.- Multilevel functions in Martin-L¿f's type theory.- An implementation from a direct semantics definition.- The structure of a self-applicable partial evaluator.- Program transformation by supercompilation.- Listlessness is better than laziness II: Composing listless functions.- From interpreter to compiler: A representational derivation.

Lieferfrist: bis zu 10 Tage

Artikelnummer: 9783540164463
Medium: Buch
ISBN: 978-3-540-16446-3
Verlag: Springer
Erscheinungstermin: 01.03.1986
Sprache(n): Englisch
Auflage: 1986
Serie: Lecture Notes in Computer Science
Produktform: Kartoniert
Gewicht: 1060 g
Seiten: 325
Format (B x H): 155 x 235 mm
