Harvey / Meisel

Auctions Law and Practice

This is the new edition of the leading work on the law and practice of auctions. The book looks at every aspect of auction practice from the economics of auction sales and restrictions on trading to criminal and other liabilities of the auctioneer. There is also a chapter on VAT. There have been important recent developments in the field of consumer protection and the book has been substantially revised to reflect these. In addition to general updating the new edition considers the practice of online auctions for the first time. There is also a section on looted art. The book continues to draw on case law from other common law jurisdictions.
