Elsevier Doyma

Rehabilitacion

For over 40 years, Rehabilitación has been the Official publication of the Spanish Society of Rehabilitation and the reference for the majority of Societies in this specialty in American and Spanish-speaking countries. Four issues are published per year, along with a monograph on a topic of major current interest as designated by the editors. The journal issues include Editorials, Original articles, Reviews and Case Studies of special interest. All the articles contain a summary in Spanish and English. The journal is written, fundamentally, by and for rehabilitation physicians. However, other medical and paramedical professionals participate as authors and readers.
