John Wiley & Sons

Archaeological Prospection

Archaeological Prospection is a comprehensive and up-to-date guide of scientific techniques available for the study of the near-surface environment. Our interdisciplinary journal promotes international collaboration amongst practitioners and academics. International in scope, our archaeological journal covers all urban, rural and marine environments. We are particularly interested in procedures and investigations for the safeguarding of historical and environmental cultural heritage. Articles reach archaeologists, scientists, site developers, local authorities and regional environmental agencies.
