Introduction to Numerical Analysis

Mathematics is playing an ever more important role in the physical and biological sciences, provoking a blurring of boundaries between scientific disciplines and a resurgence of interest in the modern as well as the classical techniques of applied mathematics. This renewal of interest, both in re search and teaching, has led to the establishment of the series Texts in Applied Mathematics (TAM). The development of new courses is a natural consequence of a high level of excitement on the research frontier as newer techniques, such as numeri cal and symbolic computer systems, dynamical systems, and chaos, mix with and reinforce the traditional methods of applied mathematics. Thus, the purpose of this textbook series is to meet the current and future needs of these advances and to encourage the teaching of new courses. TAM will publish textbooks suitable for use in advanced undergraduate and beginning graduate courses, and will complement the Applied Mathe matical Sciences (AMS) series, which will focus on advanced textbooks and research-level monographs.

Artikelnummer: 9780387954523
Medium: Buch
ISBN: 978-0-387-95452-3
Verlag: Springer
Erscheinungstermin: 21.08.2002
Sprache(n): Englisch
Auflage: Third Auflage 2002
Serie: Texts in Applied Mathematics
Produktform: Gebunden
Gewicht: 1297 g
Seiten: 746
Format (B x H): 160 x 241 mm
