Dentine Hypersensitivity

Developing a Person-Centred Approach to Oral Health

Dentine Hypersensitivity: Developing a Person-Centred Approach to Oral Health provides a detailed and integrated account of interdisciplinary research into dentine hypersensitivity. The monograph will be of interest to all those working on person centred oral health related research because it provides not only an account of the findings of a series of studies into dentine hypersensitivity drawing on the research traditions of epidemiology, sociology psychology, and dental public health but an integrated study of the benefits of exploring a single oral condition from this range of disciplines.
