Creating Web Pages for Dummies [With CDROM]

Spin a great Web page quickly and easily with this friendly guide! You don't need to be a pro designer to create your own Web page. This book guides you past the pitfalls of page design and construction so you can get online with as little hassle as possible. Whether you want to go "old school" and use HTML, experiment with online design options, or try one of the easy editing tools included on the CD, you will find the secrets to great pages right here! * Get started - decide what kind of page you want to build and get a finished product online quickly with Google Page Creator * Be designing - learn elements of design, common errors to avoid, and how to create pages that get noticed * Expand the possibilities - create photo, audio, and video content that works for your page and find online resources for storing your files * Get down to basics - maintain control by creating and editing pages in HTML with a text editor * Take a ride on easy street - develop your pages with the bonus CD's simple tools designed for beginning Web builders Bonus CD Includes Extended, fully functional trial versions of CoffeeCup Software's HTML Editor, Visual Site Designer, and Website Color Schemer, all covered in the book. Available for Windows only; see the What's On the CD Appendix for complete system requirements. Open the book and find: * Tips for picking the type of page you want to build * Insight on designing an attractive and easy-to-use page * Secrets of writing for the Web * Ways to get your photos, video, and audio files ready for your page * Step-by-step instructions on building a page with HTML, design software, and online tools * Trial versions of the design software covered in the book * The best places to post your page after you're finished
