

Methods in Extracellular Matrix Biology

Methods in Extra Cellular Matrix, Volume 142, a new volume in the Methods in Cell Biology series, continues the legacy of this premier serial with quality chapters authored by leaders in the field. Unique to this updated volume are sections devoted to Elastin, Quantification of collagen and elastin, Fibrillins, Lysyl oxidase, Fibulins, Matrilins, Hyaluronic Acid, Small leucine-rich proteoglycans, Syndecans, Fibronectin, SPARC, Thrombospondins, Tenascins, Collagen IV, Multi-photon analysis of ECM, Cell-derived extracellular matrices, Laminins, Fibrillar Collagens, Imaging ECM in developing embryos, Analysis of Matrix Degradation, Ultrastructural analysis of ECM, Versican and Large proteoglycans, and an ECM crosslink analysis. This series covers a wide array of topics about the extracellular matrix, including an understanding of crucial proteins and glycoproteins components of ECM.
