Database Security XII

Status and Prospects

New technology is always evolving and companies must have appropriate security for their business to be able to keep up-to-date with the changes. With the rapid growth in internet and www facilities, database security will always be a key topic in business and in the public sector and has implications for the whole of society.
covers issues related to security and privacy of information in a wide range of applications, including:

- Electronic Commerce
- Informational Assurances
- Workflow
- Privacy
- Policy Modeling
- Mediation
- Information Warfare Defense
- Multilevel Security
- Role-based Access Controls
- Mobile Databases
- Inference
- Data Warehouses and Data Mining.

This book contains papers and panel discussions from the Twelfth Annual Working Conference on Database Security, organized by the International Federation for Information Processing (IFIP) and held July 15-17, 1998 in Chalkidiki, Greece.
will prove invaluable reading for faculty and advanced students as well as for industrial researchers and practitioners working in the area of database security research and development.
