Policing and Technology

The rapid development of modern technologies is having profound implications on modern-day policing. Recent innovations include the proliferation of sophisticated communication and surveillance devices, developments in road traffic and crime investigation techniques, personal safety equipment, the internet and network and computer forensics, all of which are accompanied by often complex new legislative and regulative requirements. This book ensures that policing students are fully informed and completely up to date with changes, and understand the implications and impact that changing technology brings to practice. Each chapter includes clear objectives, links to the NOS, practical and reflective tasks, case studies and summaries.
