Shrader-Frechette

Taking Action, Saving Lives

Our Duties to Protect Environmental and Public Health

Pollution annually kills hundreds of thousands of people. In a brilliant, disturbing, yet readable book, Shrader-Frechette shows why this environmental epidemic continues. Campaign contributors, lobbyists, and special interests often control information by capturing media and even science itself. Yet Shrader-Frechette puts the blame - and the solution - on the shoulders of ordinary citizens. Calling for a new "democratic revolution." Arguing that justice requires us each to become he change we seek, she offers many concrete proposals for reform - many based on American Public Health Association recommendations.
