Recent Developments in Spatial Analysis

Spatial Statistics, Behavioural Modelling, and Computational Intelligence

In recent years, spatial analysis has become an increasingly active field, as evidenced by the establishment of educational and research programs at many universities. Its popularity is due mainly to new technologies and the development of spatial data infrastructures. This book illustrates some recent developments in spatial analysis, behavioural modelling, and computational intelligence. World renown spatial analysts explain and demonstrate their new and insightful models and methods. The applications are in areas of societal interest such as the spread of infectious diseases, migration behaviour, and retail and agricultural location strategies. In addition, there is emphasis on the uses of new technologoies for the analysis of spatial data through the application of neural network concepts.

Artikelnummer: 9783540631804
Medium: Buch
ISBN: 978-3-540-63180-4
Verlag: Springer
Erscheinungstermin: 19.08.1997
Sprache(n): Englisch
Auflage: 1. Auflage 1997
Serie: Advances in Spatial Science
Produktform: Gebunden
Gewicht: 1780 g
Seiten: 433
Format (B x H): 160 x 241 mm
