Matsuoka / Oldehoeft / Tholburn

Computing in Object-Oriented Parallel Environments

Third International Symposium, ISCOPE 99, San Francisco, CA, USA, December 8-10, 1999 Proceedings

of all the proceedings authors.

Complex Numbers for Java.- Automatic Generation of Executable Data Structures.- Improving Cache Utilization of Linear Relaxation Methods: Theory and Practice.- An Object-Oriented Framework for Parallel Simulation of Ultra-large Communication Networks.- Exploiting Parallelism in Real-Time Music and Audio Applications.- ARAMIS: A Remote Access Medical Imaging System.- Language Interoperability for High-Performance Parallel Scientific Components.- A Framework for Object-Oriented Metacomputing.- Tiger: Toward Object-Oriented Distributed and Parallel Programming in Global Environment.- SIFFEA: Scalable Integrated Framework for Finite Element Analysis.- Overture: Object-Oriented Tools for Applications with Complex Geometry.- Generic Programming for Parallel Mesh Problems.- Generic Graph Algorithms for Sparse Matrix Ordering.- Using Object-Oriented Techniques for Realizing Parallel Architectural Skeletons.- Loci: A Deductive Framework for Graph-Based Algorithms.- The OptSolve++ Software Components for Nonlinear Optimization and Root-Finding.- Are Generic Parallel Algorithms Feasible for Quantum Lattice Models?.- A Runtime Monitoring Framework for the TAU Profiling System.- SharedOnRead Optimization in Parallel Object-Oriented Programming.- Branch and Bound Based Load Balancing for Parallel Applications.

Lieferfrist: bis zu 10 Tage

Artikelnummer: 9783540668183
Medium: Buch
ISBN: 978-3-540-66818-3
Verlag: Springer
Erscheinungstermin: 22.11.1999
Sprache(n): Englisch
Auflage: 1. Auflage 1999
Serie: Lecture Notes in Computer Science
Produktform: Kartoniert
Gewicht: 341 g
Seiten: 208
Format (B x H): 155 x 235 mm
