Transactions on Large-Scale Data- and Knowledge-Centered Systems LI

Special Issue on Data Management - Principles, Technologies and Applications

The LNCS journal Transactions on Large-Scale Data and Knowledge-Centered Systems focuses on data management, knowledge discovery, and knowledge processing, which are core and hot topics in computer science. Since the 1990s, the Internet has become the main driving force behind application development in all domains. An increase in the demand for resource sharing (e.g., computing resources, services, metadata, data sources) across different sites connected through networks has led to an evolution of data- and knowledge-management systems from centralized systems to decentralized systems enabling large-scale distributed applications providing high scalability.

This, the 51st issue of Transactions on Large-Scale Data and Knowledge-Centered Systems, contains five fully revised selected regular papers. Topics covered include data anonyomaly detection, schema generation, optimizing data coverage, and digital preservationwith synthetic DNA.

Lieferfrist: bis zu 10 Tage

Artikelnummer: 9783662661109
Medium: Buch
ISBN: 978-3-662-66110-9
Verlag: Springer
Erscheinungstermin: 08.10.2022
Sprache(n): Englisch
Auflage: 1. Auflage 2022
Serie: Lecture Notes in Computer Science
Produktform: Kartoniert
Gewicht: 236 g
Seiten: 137
Format (B x H): 155 x 235 mm
