

INTRO MODEL-BASED SUR SAM APP 37 OSSS C

Excellent exposition on model-based survey sampling from leading researchers Ideal overview for graduate students in statistics, sciences, and social sciences This text brings together important ideas on the model-based approach to sample survey, which has been developed over the last twenty years. Suitable for graduate students and professional statisticians, it moves from basic ideas fundamental to sampling to more rigorous mathematical modelling and data analysis and includes exercises and solutions.
