

Gadamer

Philosophical Apprenticeships

These autobiographical reflections by a major contemporary philosopher offer an enjoyable and enlightening tour not only of his own intellectual development but of the rich and fruitful collaboration of minds during a rich period in German cultural history. Hans-Georg Gadamer, the author of *Truth and Method*, traces his "philosophical apprenticeships" with some of the most important thinkers of the 20th century. Perhaps more than anyone else, Hans-Georg Gadamer, who is Professor Emeritus at the University of Heidelberg, is the doyen of German philosophy and the recognized chief theorist of hermeneutics. His book *Reason in the Age of Science* (MIT Press paperback) is an ideal introduction to his thought and to the problems of hermeneutics more generally. *Philosophical Apprenticeships* is included in the series *Studies in Contemporary German Social Thought*, edited by Thomas McCarthy.
