

Nursing Outcomes Classification (NOC)

Measurement of Health Outcomes

This text standardizes the terminology and criteria for measurable or desirable outcomes as a result of interventions performed by nurses. Clinicians, students, educators, researchers, and administrators in a variety of clinical, educational and research venues can use the classification, which serves as an important focus for both cost containment and effective care. This new edition is even more comprehensive and includes specific indicators that can be used as intermediate outcomes or to evaluate and rate the patient in relation to outcome achievement.
