

Trawick-Smith

Young Children's Play

Development, Disabilities, and Diversity

Young Children's Play: Development, Disabilities, and Diversity is an accessible, comprehensive introduction to play and development from birth to age 8 years that introduces readers to various play types and strategies and helps them determine when intervention might be needed. Skillfully addressing both typically developing children and those with special needs in a single volume, this book covers dramatic play, blocks, games, motor play, artistic play, and non-traditional play forms, such as humor, rough and tumble play, and more. Designed to support contemporary classrooms, this text deliberately interweaves practical strategies for understanding and supporting the play of children with specific disabilities (e.g. autism, Down syndrome, or physically challenging conditions) and those of diverse cultural backgrounds into every chapter. In sections divided by age group, Trawick-Smith explores strategies for engaging children with specific special needs, multicultural backgrounds, and incorporating adult-child play and play intervention. Emphasizing diversity in play behaviors, each chapter includes vignettes featuring children's play and teacher interactions in classrooms to illustrate core concepts in action. Filled with research-based applications for professional practice, this text is an essential resource for students of early childhood and special education, as well as teachers and coaches supporting early grades or inclusive classrooms.
