The idea behind this book is to simplify the journey of aspiring readers and researchers to understand Big Data, IoT and Machine Learning. It also includes various real-time/offline applications and case studies in the fields of engineering, computer science, information security and cloud computing using modern tools. This book consists of two sections: Section I contains the topics related to Applications of Machine Learning, and Section II addresses issues about Big Data, the Cloud and the Internet of Things. This brings all the related technologies into a single source so that undergraduate and postgraduate students, researchers, academicians and people in industry can easily understand them. Features - Addresses the complete data science technologies workflow - Explores basic and high-level concepts and services as a manual for those in the industry and at the same time can help beginners to understand both basic and advanced aspects of machine learning - Covers data processing and security solutions in IoT and Big Data applications - Offers adaptive, robust, scalable and reliable applications to develop solutions for day-to-day problems - Presents security issues and data migration techniques of NoSQL databases

This book discusses the Internet of Things (IoT) and Data Analytics from a technical, application, and business point of view. It describes essential technical knowledge, building blocks, processes, design principles, and implementation of big data tools and machine learning techniques and applications for IoT projects.

Artikelnummer: 9780367336745
Medium: Buch
ISBN: 978-0-367-33674-5
Verlag: CRC Press
Erscheinungstermin: 30.07.2020
Sprache(n): Englisch
Auflage: 1. Auflage 2020
Serie: Internet of Everything (IoE)
Produktform: Gebunden
Gewicht: 625 g
Seiten: 337
Format (B x H): 161 x 240 mm
