

Social Trust

With increasingly divergent views and commitments, and an all-or-nothing mindset in political life, it can seem hard to sustain the level of trust in other members of our society necessary to ensure our most basic institutions work. This book features interdisciplinary perspectives on social trust. The contributors address four main topics related to social trust. The first topic is empirical and formal work on norms and institutional trust, especially the relationships between trust and human behaviour. The second topic concerns trust in particular institutions, notably the legal system, scientific community, and law enforcement. Third, the contributors address challenges posed by diversity and oppression in maintaining social trust. Finally, they discuss different forms of trust and social trust. Social Trust will be of interest to researchers in philosophy, political science, economics, law, psychology, and sociology.

With increasingly divergent views and commitments, and an all-or-nothing mindset in political life, it can seem hard to sustain the level of trust in other members of our society necessary to ensure our most basic institutions work. This book features interdisciplinary perspectives on social trust.
