

Extending the Horizons: Advances in Computing, Optimization, and Decision Technologies

Computer Science and Operations Research continue to have a synergistic relationship and this book represents the results of cross-fertilization between OR/MS and CS/AI. It is this interface of OR/CS that makes possible advances that could not have been achieved in isolation. Taken collectively, these articles are indicative of the state-of-the-art in the interface between OR/MS and CS/AI and of the high caliber of research being conducted by members of the INFORMS Computing Society.

Extending the Horizons: Advances in Computing, Optimization, and Decision Technologies is a volume that presents the latest, leading research in the design and analysis of algorithms, computational optimization, heuristic search and learning, modeling languages, parallel and distributed computing, simulation, computational logic and visualization. This volume also emphasizes a variety of novel applications in the interface of CS, AI, and OR/MS.

Artikelnummer: 9780387487908

Medium: Buch

ISBN: 978-0-387-48790-8

Verlag: Springer

Erscheinungstermin: 28.12.2006

Sprache(n): Englisch

Auflage: 2007

Serie: Operations Research/Computer Science Interfaces Series

Produktform: Gebunden

Gewicht: 633 g

Seiten: 266

Format (B x H): 160 x 241 mm
