Willenborg / Waal

Statistical Disclosure Control in Practice

The aim of this book is to discuss various aspects associated with disseminating personal or business data collected in censuses or surveys or copied from administrative sources. The problem is to present the data in such a form that they are useful for statistical research and to provide sufficient protection for the individuals or businesses to whom the data refer. The major part of this book is concerned with how to define the disclosure problem and how to deal with it in practical circumstances.

This book discusses the very important problem of disseminating personal or business data collected in censuses or surveys. It provides advice in practical situations how to protect individuals or businesses while presenting data in a way that makes them useful for statistical research. Both of the authors are employed at Statistics Netherlands.
