Pediatric Oculoplastic Surgery

Foreword by A. Linton

This is a definitive text on ocular disorders which looks specifically at the case of children. Topics include: genetic considerations, embryology and anatomy, anesthesia, dermatologic considerations, benign and malignant tumours, fetal wound healing, establishing proper diagnosis, and many others. The book features many colour photographs and custom illustrations that present comprehensive and easy-to-use information on the identification and treatment of a wide range of ocular disorders. The volume is an essential addition to the library of every pediatric ophthalmologist and reconstructive surgeon.

Pediatric Oculoplastic Surgery is the definitive text for ocular disorders and how they apply specifically to children. Addressing everything from genetic considerations, embryology and anatomy, anesthesia, dermatologic considerations, benign and malignant tumors, fetal wound healing, establishing proper diagnosis, timing for surgical interventions and surgical procedures. This volume is an essential addition to the library of every pediatric ophthalmologist and reconstructive surgeon. The distinguished contributors have combined their surgical knowledge and experience with over 1,100 color photographs and custom illustrations to present comprehensive and readily usable information on the identification and treatment of a wide range of ocular disorders.
