

Structural Adjustment

Theory, Practice and Impacts

Structural Adjustment: Theory, Practice and Impacts examines the problems associated with Structural Adjustment Programmes (SAPs) and reveals the damaging impacts they can have. The book looks at how the debt crisis of the 1970's forced developing countries to seek external help and then reviews what constitutes as a standard adjustment programme, detailing the political, economic, social and environmental impacts of SAPs. The final section draws together theories and political responses and presents a case for alternatives to the programmes.

Focusing on Africa, Latin America and Asia, this book presents the origins, impacts and alternatives to SAPs in an accessible and systematic manner and demonstrates the complex effects of these programmes.
