Beyond Beijing

Liberalization and the Regions in China

This book offers a balanced assessment of the dynamics and consequences of the decentralization of power and resources in post- Mao China. The author argues that decentralization has increased tensions amongst ethnic groups and unleashed much competition and emulation among local governments. This book is an authoritative study of an issue that will remain highly visible on China's political agenda for the forseeable future.

Economic liberalisation has led to disparities of wealth between the different regions of China, in turn leading to tensions. This book is an authoritative study of an issue that will remain high on China's political agenda in the future.
