Azzouni

Knowledge and Reference in Empirical Science

Knowledge and Reference in Empirical Science is a fascinating study of the bounds between science and language: in what sense, and of what, does science provide knowledge? Is science an instrument only distantly related to what's real? Can the language of science be used to adequately describe the truth? In this book, Jodi Azziouni investigates the technology of science - the actual forging and exploiting of causal links, between ourselves and what we endeavor to know and understand.

A fascinating study of the bounds between science and language; knowledge and truth. Jody Azzouni explores how the language of science transforms our fragmented investigations of the world into a unitary and seamless discourse.
