Graham

The Cybercities Reader

Providing the most comprehensive, international and interdisciplinary analysis yet of the relationships between cities, urban life and new technologies, this informative book incorporates detailed discussions of cybercity history, theory, economic processes, mobilities, physical forms, social and cultural worlds, digital divides, public domains, strategies, politics and futures. The book includes coverage of post modern technoculture, virtual reality and the body, global city economies, urban surveillance, e-commerce, teleworking, community informatics, digital architecture, urban technology strategies, and the role of cities and new technologies in the 'war on terrorism'. The first interdisciplinary book to address the complex interrelationships between the use and application of electronic technologies and practices and processes of contemporary metropolitan life, this key text adopts a uniquely international perspective. Detailed case studies include 'virtual cities' in Amsterdam, Internet cabins in Lima, back offices in Jamaica, and 'smart' highways in Melbourne. An excellent teaching aid with part, section and individual extract introductions, this outstanding book provides an up-to-date snapshot of how policies for cities and cyberspaces are being combined across the world.

Bringing together a vast range of debates and examples of city changes based on Information and Communications Technology (ICT), this book illustrates how new media in cities shapes societies, economies and cultures.
