

Das

An International Finance Reader

International Finance is one of the most important areas of interest in economics and business. With the liberalization of international capital over the last half-century, financial capital has flowed in and out of countries at amazing rates. This collection examines issues such as: * financial globalization * multilateral financial institutions * capital flows to emerging economies * exchange rate regimes. The topical contributions are well written and understandable for those interested in international finance, while the comprehensive nature of the book along with its pedagogical features such as exam style questions and areas for further research make the book ideal for students on an International Finance course. The lessons that can be learned from the distinguished authors are equally useful for businessmen and policy-makers.
