How China Works

Perspectives on the Twentieth-Century Industrial Workplace

Spanning the whole of the twentieth century, How China Works examines the labour issues surrounding the workplace in China in both the Republican and People's Republic epochs. The international team of contributors treat China's twentieth-century revolution as an industrial revolution, stressing that China's recent emergence as the new workshop of the world was a gradual change, and not a recent phenomena led by external forces. Providing the reader with extensive ethnographic research on topics such as culture and community in the workplace, the rural-urban divide, industrialization, subcontracting and employment practices, How China Works really does ground the study of Chinese work in the daily interactions in the workplace, the labour process and the micropolitics of work.

Presenting compelling case study material, international specialists examine the labour issues surrounding the workplace in China during a tumultuous time in the country's history and reassesses the significance of labour process theory in the context of the changing Chinese workplace.
