# The Pragmatics Reader

The Pragmatics Reader is the indispensable set of readings for all students studying Pragmatics at advanced undergraduate and postgraduate levels. Combining key classic texts with newer extracts covering current developments in contemporary Pragmatics, each reading has been carefully selected to both showcase the best thinking and latest research and also to reflect the international nature of the field. The 30 varied readings, including four specially commissioned papers, have been organised into eight themed sections: Linguistic Pragmatics; Post-Gricean Pragmatics; Indexicality; Historical Pragmatics; Politeness, Face and Impoliteness; Cross-cultural and intercultural pragmatics; Pragmatics and Conversation - Development and Impairment; and Pragmaticians on Pragmatics. Each of these sections is supported and enhanced by substantial editorial commentaries, pre-reading, in-reading and post-reading activities and suggestions for further reading, both in print and online. The book also features a general introduction, a glossary of key terms, and a conclusion that explores the relationship between pragmatic theory and practice before anticipating the future directions of the subject.
