Community Architecture

How People Are Creating Their Own Environment

First published in 1987, this title was one of the first to explore the emerging popular movement of Community Architecture, championed by Prince Charles, which gained momentum throughout Britain in the 1970s and 1980s. The conceptual framework rests fundamentally on the principle that the built environment is most effective when those who live in a particular area are actively engaged with its creation and daily administration. A work that has influenced policy makers and planning legislation, Community Architecture remains one of the key reference works for student architects and planners.
