Goffman and Social Organization

Studies of a Sociological Legacy

Erving Goffman is considered by many to have been one of the most important sociologists of the post-war era. His close observation of everyday life and his concern with the ways in which people play roles and manage the impressions they present to each other led to his pioneering creation of a new dramaturgical perspective for sociology. His later analysis explored the field of deviance and many of his works in this area are now considered as sociological classics, including *Asylums*, *The Presentation of the Self in Everyday Life* and *Stigma*. This collection brings together many of today's leading sociologists to pursue and build upon the diverse aspects of Goffman's legacy. The contributors present chapters on key topics of Goffman's work. Issues covered include: * mental illness and institutionalism * the incorporation of literary intertexts in Goffman's writings * Goffman's relationship to ethnomethodology * the singularity of Goffman's ethnography Ranging from his critique of institutionalization to his understanding of the minute details of face-to-face interaction, this collection reveals the richness of Goffman's own work as well as his contribution to sociology today and will be essential reading for students and academics alike.
