Data Made Flesh

Embodying Information

In an age of cloning, cyborgs, and biotechnology, the line between bodies and bytes seems to be disappearing. Data Made Flesh is the first collection to address the increasingly important links between information and embodiment, at a moment when we are routinely tempted, in the words of Donna Haraway, "to be raptured out of the bodies that matter in the lust for information," whether in the rush to complete the Human Genome Project or in the race to clone a human being.
