

Computer Methods in Structural Masonry - 4

Fourth International Symposium

The proceedings of the fourth symposium on this topic examine the rapid advances and innovations being made in the theoretical and applied aspects of structural masonry. Focusing on the integration of computer modelling with experimental methods, assessment techniques, restoration and retro-fitting procedures, this is a thorough examination of the subject by leading international experts. Contains numerous graphs and tables.

With contributions from leading international experts in this field, this book is an essential reference for engineers, researchers, architects and manufacturers working with masonry materials and structures.
