

Aulton's Pharmaceutics

The Design and Manufacture of Medicines

Thoroughly revised, updated, and extended by experts in their fields, and edited by Professors Kevin Taylor and Michael Aulton, Aulton's Pharmaceutics, 7th Edition, comprehensively covers the science and practice of formulation, pharmaceutical manufacturing, and drug delivery. This essential pharmaceutics textbook offers a complete course in one book for students in all years of undergraduate pharmacy and pharmaceutical sciences degrees. It is also an invaluable resource for students undertaking postgraduate studies in the pharmaceutical sciences, practitioners in the pharmaceutical and associated industries, and those working in hospital pharmacy technical services and medicines regulation. It features a clear, readily accessible writing style, extensive illustrations, and numerous tables, figures, and information boxes to assist with the understanding of this complex subject area. - Provides an essential companion to the entire pharmaceutics curriculum from day one until the end of the course—written specifically for those new to the design and manufacture of dosage forms - Contains updates throughout to reflect advances in formulation and drug delivery science, pharmaceutical manufacturing, quality control and medicines regulation - Demonstrates how an understanding of relevant pharmaceutical science and technology is essential for the design and manufacture of high quality, safe, and effective medicines - Reflects current practices and future applications of formulation and drug delivery science to small drug molecules, biotechnology products including antibodies and nucleic acids, and nanomedicines - Includes key points boxes for quick summaries of important information, and more than 400 multiple-choice questions online for self-assessment to review and consolidate learning - An eBook version is included with purchase. The eBook allows you to access all of the text, figures, and references, with the ability to search, make notes and highlights, and have content read aloud
