

Recent Advances in Targeting Inflammation

Ion channels, GPCR Signaling Tools, Therapies, and Beyond

Recent Advances in Targeting Inflammation: Ion Channels, GPCR Signaling Tools, Therapies, and Beyond delves into the multifaceted occurrences of inflammation across different systems, such as neuroinflammation and gastric inflammation. The book's main goal is to present the latest highlights, covering advancements in inflammation, investigational therapies, animal models, and biomarkers. These insights are crucial for better diagnosis, monitoring, and potential therapeutic options for patients suffering from both acute and chronic inflammation. This comprehensive work explores various topics, including ion channel regulation in inflammation, GPCR regulation, signaling pathways, and therapeutic approaches. It emphasizes the importance of understanding the role of ion channels, GPCR, and nutrition in managing inflammation effectively. Additionally, the book discusses the global impact of chronic inflammation on health outcomes, stressing the need for improved healthcare planning and strategies.
