

International Private Equity

Bringing a unique joint practitioner and academic perspective to the topic, this is the only available text on private equity truly international in focus. Examples are drawn from Europe the Middle East, Africa and America with major case studies from a wide range of business sectors, from the prestigious collection of the London Business School's Collier Institute of Private Equity. Much more than a simple case book, however, *International Private Equity* provides a valuable overview of the private equity industry and uses the studies to exemplify all stages of the deal process, and to illustrate such key topics as investing in emerging markets; each chapter guides the reader with an authoritative narrative on the topic treated. Covering all the main aspects of the private equity model, the book includes treatment of fund raising, fund structuring, fund performance measurement, private equity valuation, due diligence, modeling of leveraged buyout transactions, and harvesting of private equity investments.

Written from a unique joint practitioner and academic perspective by renowned experts in the field, *International Private Equity* is designed to be truly international in focus, with examples and case studies drawn from Europe, the Middle East, Africa and Asia, and from a wide range of business sectors. The case studies, taken from the collection of the London Business School's prestigious Collier Institute of Private Equity, are used to exemplify and illustrate all stages of the private equity deal process.

To provide a context for these illustrative case studies, which make up the last section of the book, *International Private Equity* first covers all of the main aspects of the private equity model:

Part one provides an overview of the subject and a private equity fund level analysis, including coverage of fund economics, fund performance measurement, private equity investments in emerging markets, fund due diligence, fund accounting, the secondaries market for fund interests and alternative fund structures such as fund of funds and listed private equity funds.

Part two moves onto analysis at deal level, and covers topics such as valuation of private equity companies, deals analysis and due diligence, LBO transactions and modeling, post deal execution and the harvesting of private equity investments.

Part three deals with early stage investing and includes chapters on Business Angel investing and Venture Capital.

This unprecedented access to the Collier Institute's collection of case studies, combined with comprehensive and timely coverage of this important topic, makes *International Private Equity* an indispensable guide for students and practitioners alike.

"Professors Talmor and Vasvari combine academic rigor and real world cutting edge experience to provide an insightful and detailed description of private equity today. This is a most valuable contribution to academia, the industry, and to business in general."

Henry R. Kravis, Co-Chairman and Co-CEO, Kohlberg, Kravis Roberts

"International Private Equity provides a most comprehensive insight and practical review of what the private equity world is. Professors Eli Talmor and Florin Vasvari have distilled years of investing experience and financial analysis into a text that is a must-read for everyone interested in the field, whether a novice student or an experienced investor."

Dominique Senequier, CEO, AXA Private Equity
