

Aristotle

Problems, Volume I

Books 1-19

Peripatetic potpourri. Aristotle of Stagirus (384–322 BC), the great Greek philosopher, researcher, logician, and scholar, studied with Plato at Athens and taught in the Academy (367–347). Subsequently he spent three years in Asia Minor at the court of his former pupil Hermeias, where he married Pythias, one of Hermeias' relations. After some time at Mitylene, he was appointed in 343/2 by King Philip of Macedon to be tutor of his teen-aged son Alexander. After Philip's death in 336, Aristotle became head of his own school (of "Peripatetics"), the Lyceum at Athens. Because of anti-Macedonian feeling there after Alexander's death in 323, he withdrew to Chalcis in Euboea, where he died the following year. *Problems*, the third-longest work in the Aristotelian corpus, contains thirty-eight books covering more than 900 problems about living things, meteorology, ethical and intellectual virtues, parts of the human body, and other topics. Although *Problems* is an accretion of multiple authorship over several centuries, it offers a fascinating technical view of Peripatetic method and thought. *Problems*, in two volumes, replaces the earlier Loeb edition by Hett, with a text and translation incorporating the latest scholarship.
