Industry and Air Power

The Expansion of British Aircraft Production, 1935-1941

The author begins with a general survey of British aircraft manufacturing in the inter-war period. Policy, production, finance and contracts are examined, and the final chapter is concerned with the mobilization of the aircraft industry in 1939, and the emergency measures of 1940.

The author examines the relationship between industry and the state during the period immediately before the Second World War when increasing tension resulted in large government contracts.
