Dumitrache / Mioc / Popescu

Flows, Boundaries, Interactions

Our workshop was divided in two important sections: (1) Sun and Heliosphere; (2) Stars and galaxies. The first section treated solar magnetic structures such as active regions, flares and CMEs, prominences and coronal streamers. Both observational and models works were presented. Flows, boundaries and interfaces were approached in numerical simulations. The second section of the workshop was devoted to stellar studies, extragalactic astronomy and especially cosmology.
