

Non-Neutral Plasma Physics VII

Workshop on Non-Neutral Plasmas 2008

These proceedings report the latest research in the field of non-neutral plasmas, including basic studies and applications of single component plasmas made from electrons, ions, or antimatter. Specific topics include ultracold plasmas, trapped ions, toroidal plasmas, transport and collective modes in Penning-Malmberg traps, antimatter plasmas and low-energy anti-hydrogen. The topics covered will be of interest to researchers at universities and laboratories working in the fields of plasma physics, atomic physics, and antimatter science.
