Defence Logistics

Enabling and Sustaining Successful Military Operations

The management of logistics and supply chain operations is of vital importance in the defence sector. **Defence Logistics** looks at established theories and their practical utility, providing insights into current thinking for postgraduate and undergraduate students, lecturers, researchers, practitioners and professionals through real-life case studies. **Defence Logistics** focuses on key areas of logistics and supply chain management in context, such as sustainability, inventory management, resilience, procurement, information systems and crisis response. This comprehensive and up-to-the-minute collection includes contributions from international academics from a range of universities, academies and defence schools, along with practitioners who are currently working in the field of defence logistics.
