

Our Digital World

Our Digital World uses a contemporary approach to traditional computer concepts learning by integrating text and engaging technologies. It connects concepts learning with the way individuals use today's various online technology through a web-centric experience. Students view videos, play with interactive hands-on tools, connect with their classmates through blogs and wikis, and discover where technology is headed by watching videos online. Complete course content is delivered in the Cirrus learning environment through a series of scheduled assignments that report to a grade book to track student progress and achievements.
