

Computers: Understanding Technology - Brief

Computers: Understanding Technology is a competency-based, objective-driven program that challenges students to develop the tech skills needed for job survival and career growth. It introduces basic concepts in computer and information technology, including hardware, software, networks, and the internet. Its embedded interactivity and responsive design guides students to become active learners. From quizzes that test students' competency on a learning objective, to diverse digital learning resources, this courseware prepares students for today's workplace. This courseware is available in comprehensive and brief versions. Complete course content is delivered in the Cirrus learning environment through a series of scheduled assignments that reports to a grade book to track student progress and achievements.
