

Do Arrests and Restraining Orders Work?

Since empirical research on domestic violence began in the 1970s, it has become clear that without intervention, significant percentages of domestic violence cases escalate into more serious incidents. However, with the exception of cases resulting in homicides, there are no reliable criminal justice statistics that document the rates of serious domestic violence incidents. What, then, are the most effective means--in terms of safety and cost--of protecting victims? Featuring writings from noted contributors, *Do Arrests and Restraining Orders Work?* grapples with the markedly different results of research and analyses on the effectiveness of arrests and restraining orders. This probing volume examines the proper role of arrest and the degree to which the criminal justice system can rely on restraining orders to prevent domestic and other kinds of violence. Representing a wide array of research methods, the chapters include a variety of perspectives, including those from police, prosecutors, the judiciary, and probation officers. Timely and provocative, *Do Arrests and Restraining Orders Work?* asks the challenging questions that will help the criminal justice system move toward effective solutions. This volume is an excellent resource for students as well as researchers and academics in criminology and for a wide array of criminal justice professionals, including police management personnel, attorneys, and policymakers.

In this provocative contribution to the debate on which interventions are most effective in reducing domestic violence, a wide range of research methods and analyses are presented and a number of issues raised. These include: whether the criminal justice response to domestic violence is inadequate; whether there is a conflict of interest between society and the victim of violence; and whether alternative means should be used to deter chronic batterers who are undeterred by the criminal justice response.
