Daredevil Research

Re-creating Analytic Practice

Daredevil Research: Re-creating Analytic Practice gathers together ten research projects that seek to transform thinking about analytic practice and the construction of research knowledge. By experimenting with alternative models of representation unconstrained by the weight of traditional research protocols, the authors create multiple spaces for imagining how to differently identify issues for inquiry, select modes of analysis, and inscribe «data» into transmittable form. At once a production of research knowledge and a conceptual field for meaning-making, *Daredevil Research* suggests the possibilities of analytic practice in imaginative, independent space.
