

The NICHE model demonstrates improved clinical outcomes, positive fiscal results, enhanced nursing competencies, community recognition, and greater patient, family, and staff satisfaction. This official guidebook to the NICHE model of care provides nurses with the knowledge and skills for delivering best practice in the care of older adults. Primarily hospital-based, NICHE currently has a network of over 600 national and international healthcare organizations. The NICHE model ensures that every adult age 65 and over receives care that promotes dignity, autonomy and function. Written by world-leading experts in gerontological nursing, this distinguished publication serves as the gold standard manual for nurses and all clinical care providers looking to provide optimal, evidence-based care to their older patients. As the leading nurse-driven program designed to address the complex needs of older adults, the NICHE model emphasizes the role of the nurse as a change agent and leader for effective program development, implementation of best practices, and formulation of healthcare policy. This model engages frontline practicing nurses and staff, providing the requisite knowledge and skills to work autonomously with full responsibility and authority in complex healthcare systems. Key Features: - Reflects the best practices of the over 600 NICHE hospitals - Features multiple case studies and exemplars - Uses an interprofessional approach to care - Draws on leading gerontological nursing experts nationally and internationally - Highly relevant to a global audience - This publication also serves as the policy, planning and implementation companion to Evidence-Based Geriatric Nursing Protocols for Best Practice, edited by Marie Boltz, PhD, RN, GNP-BC, FGSA, FFAN et al
