

Habermas

Jürgen Habermas is one of the most important contemporary philosophers and social theorists. The author of over forty works, including the seminal Theory of Communicative Action, his work ranges across critical theory, epistemology, ethics, aesthetics, the philosophy of science, citizenship and democracy, religion and psychoanalysis, forging new paradigms and engaging with other key thinkers. All students and teachers of contemporary Continental thought need to understand Habermas's major contributions to philosophy and critical theory. Habermas: A Guide for the Perplexed is the ideal starting point for anyone studying Habermas, and an invaluable companion text to any course of study that includes his work. It follows Habermas's critical and philosophical project through all the stages of its development – the early critical theory, the linguistic turn, communicative action and discourse ethics, the theory of deliberative democracy - building up a complete overview of his work, and offering close and incisive analysis throughout. All Habermas's major publications, including The Theory of Communicative Action, are covered in detail.

Jürgen Habermas' work ranges across critical theory, epistemology, ethics, aesthetics, the philosophy of science, citizenship and democracy, religion and psychoanalysis, forging new paradigms and engaging with other key thinkers.
