Progress for Management and Engineering

Increasing corporate social responsibility demands professionals possess the necessary knowledge, abilities, and competencies to answer the needs of a diverse organization’s stakeholders. This book highlights the most recent issues related to higher education in the fields of management and engineering. It explains why a sustainable education is a requirement for professionals, as well as the organizations they collaborate with. Higher Education: Progress for Management and Engineering focuses on the latest research findings in the field of higher and sustainable education. It discusses the progress, shares knowledge and insights on an international scale, and highlights the challenges faced to obtain and secure a more responsible and sustainable management system. Selecting different options and strategies, how to set priorities on managing competition, and how to succeed as an organization that can lead to successes in both national and international markets are covered within this book. This book can be used as a reference for researchers, academics, managers, engineers, and other professionals involved in higher and sustainable education in management and engineering.
